

Visual Arts - Creating a sense of depth

Use the large rectangles to come up with a large number of ideas (up to 120).

Then choose the best and connect them together to practice showing a sense of depth in the boxes below.

Overlap

Create a sense of space by having the nearest element in front of and cutting off part of the far object.

Size

Create a sense of space by having the near element be much larger than a far one.

Distance from bottom of page

Create a sense of space by having the near element toward the bottom of the page and the far one higher.

Contrast

Create a sense of space by shading the near object with high contrast and the far one with muddy greys.
