

Portraiture — More portrait practice

For this worksheet, draw a **mirror image** of the photograph in the other half of the rectangle.

Focus on:

- starting with a light outline
- recording the shapes and sizes accurately
- shading with smoothness, good contrast, and good blending

Remember that the trick to realistic drawing is to forget what you are looking at.

Don't draw the eye: **draw the shapes of the shadows that create an eye.**

Avoid potato heads: join the parts together with shading.
