# Printmaking

\_\_\_/10 Idea development

## Criteria for your three finished prints:

**Quality of carving:** Carve with crisp contour, using a wide variety of line widths and shapes.

**Quality of printing:** Hand in your best three prints. Create clean lines, crisp edges, solid darks and clean whites. Print with careful alignment, and consistency between prints.

**Composition:** Create prints that are complete and full. Make sure you have a non-central composition and a balance of light areas and dark areas.

# Printmaking Project outline

Printmaking is an ancient process that allows a person to create huge numbers of prints from a single drawing. In its simplest form, it involves carving into a material to make a stamp, putting ink on it, and then transferring that ink onto paper.

We are going to be carving into 8x10" print blocks with chisels and linozip tools. Then we will use brayers (ink rollers) to ink the blocks before placing paper on them and rubbing it with barrens and wooden spoons.

## Things to remember

- Anything you carve onto your block will be reversed left to right, such as type or printing.
- If you want to transfer a drawing onto your block, consider using tracing paper or graphite/pastel transfer.
- Printmaking is often called the *art of the white line*. That means that everything that is white will be carved away and anything black will be left behind. (Yes, a reversed image is cool looking, but it is also a sign of someone who cannot figure out how to reverse their drawing naturally.)
- When planning your artwork, consider drawing with light coloured pencils on black paper. Also consider putting drawing ink on your linoleum block first, and then drawing with light coloured pencils on top of that too.

# Skill builder Observing lines for printmaking

The strangest thing about printmaking is that you have to carve **white lines** out of a **dark background**. This is the reverse of what we do with a pencil. It **takes practice** to get used to this!

# Idea Development

## 1 Generate ideas

*maximum of 50%*

Use lists, a web map, or simple drawings to come up with a LOT of ideas! If you already have an idea in mind, choose that as your central theme and expand upon it. Let your ideas wander - one idea leads to another. Drawings can be details of source images, different viewpoints, textures, technical experiments, etc.

Number of **words** → \_\_\_\_ ÷ 3 = \_\_\_\_%

Number of **simple** sketches → \_\_\_\_ × 2% = \_\_\_\_%

Number of **better** sketches → \_\_\_\_ × 4% = \_\_\_\_%

## 2 Select the best and join together ideas

**Circle the best ideas**

circled = □ 5%

**Link into groups of ideas**

linked = □ 5%

## 3 Print reference images

- Print **EIGHT** reference images so you can accurately observe the challenging parts of your artwork. Taking your own and using own photographs is preferred, but image searches are also fine.
- **Do not simply copy a picture that you find.** The idea is to edit and combine source images to create your own artwork. If you simply copy a picture, you are plagiarizing and will earn a zero for your idea generation and any criteria involving creativity in your final artwork.
- Up to half of your pictures may be of drawings, paintings, or other artworks of others to use as inspiration. The other images must be realistic photographs.
- You must hand in the **printed** copy of the images to earn the marks.

\_\_\_\_ images × 5% = \_\_\_\_%

*maximum of 8 images*

## 4 Compositions

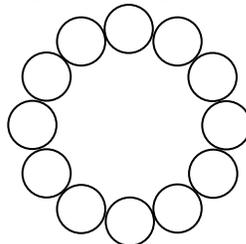

- Create thumbnail drawings anywhere in the idea development section.
- These should be based on combinations of ideas that you can up with. Include your **background**.
- Experiment with unusual angles, viewpoints, and arrangements to help make your artwork stand out.
- Draw a frame around your thumbnails to show the edges of the artwork.
- Selecting a **colour scheme** counts as a composition, and so do rough **digital collages**

\_\_\_\_ **thumbnails** × 8% + \_\_\_\_ **digital collages** × 8% = \_\_\_\_%

*max of 10 thumbnails*

Selecting a **colour scheme**

= □ 8%

## 5 Rough copy

- Take the best ideas from your thumbnails and combine them into an improved rough copy.
- Use this to work out the bugs and improve your skills before you start the real thing.
- If you are using colour, use paint or coloured pencil to show your colour scheme.
- Draw in a frame to show the outer edges of your artwork.
- **Remember to choose a non-central composition.**

\_\_\_\_ drawing × 25% = \_\_\_\_%

*great quality or better*

**Total = \_\_\_\_%**

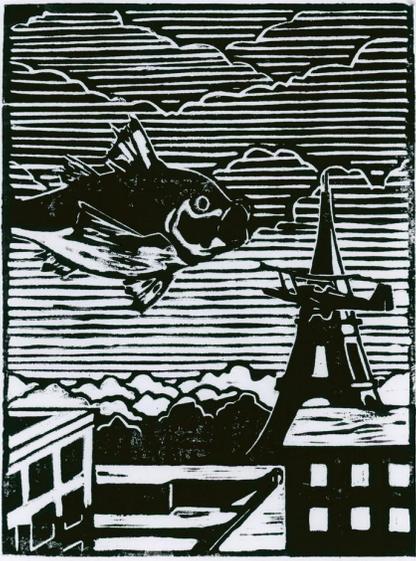

**NOTE:** If you simply copy a picture from the internet, you get **25%**.
